Lomi's Playground nYID Hanfu Instructions

Print all pages and assemble the top's pattern pieces as shown. Glue shoulder of front and back together before attaching sleeves. Top should be cut as one large piece of material.

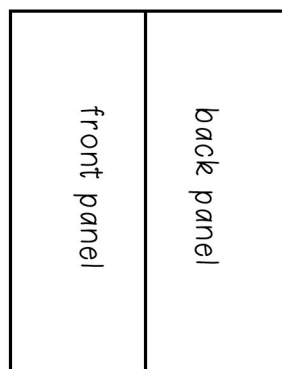

For the collar, cut one strip of fabric 1.5 inches wide and 20 inches long. Due to size constraints, the collar and skirt pieces cannot be printed as a pattern.

Collar - 1.5 inches x 20 inches

For the skirt, measure around fullest part of doll's bust. Add 1.5 inches (4 cm) to total measurement as seam allowance. This measurement is the skirt WIDTH. Then, measure from under the doll's arm to the bottom of their feet (or the floor.) Add .5 inches (1cm) for a seam allowance. This measurement is the skirt LENGTH.

PLEAT CHOSEN FABRIC BEFORE CUTTING TO ENSURE FIT.

Cut a rectangle from the pleated fabric, following the width and length measurements listed above. Then cut this rectangle in half to create two panels. Use ribbon for the waistband.

Cut pleated skirt panel in half to create front and back panels. The seam allowance was already included in our measurements.
